- ❑ Making open border relationship with the rest of the world.
- ❑ Depended on development actors, organizations and countries.

Sector-wise contribution in economy

Historical Background of the Economy of BD

Sheikh Mujibur Rahman Era: Between 1972 to 1975, the government of Bangladesh took nationalization policy. That means nationalized economy or, state own economy.

Ziaur Rahman Era: Between 1976 to 1981, denationalized economy followed in place of nationalized policy.

H. M. Ershad Era: Between 1982 to 1990, focused on the denationalized economy, more especially development of Private sector has followed.

Khaleda Zia Era: Between 1991 to 1996 and between 2001 to 2006, More importance was given to trade. In the economic interest of the nation, the policymakers of Bangladesh would come closer to India, China, USA and other countries for bilateral, regional and international economic cooperation.

Sheikh Hasina Era: Between 1996 to 2001, and 2008-till, focused on Foreign Investment; International Migration and Remittances; and Implementation of Mega Projects. "Bay of Bengal Industrial Growth Belt (BIG-B)", the improvement of the investment environment and regional connectivity also has taken.

Approaches to Development Planning in BD

**Annual Development Plan
(ADP)**

Five Year Plans (FYP)

Perspective Plan (2010-2021)

Vision 2041

Vision 2071

Delta Plan 2100

Development planning provides the road map for accelerated growth and lays down broad approaches for the eradication of poverty, inequality, and human deprivation.

Over the past 50 years since independence, Bangladesh has increased its real per capita income, cut poverty by more than one third, and is well set to achieve most of the Sustainable Development Goals.

Article 15 of the Bangladesh Constitution requires that the country should follow the path of a planned economy for realizing its development objectives.

Bangladesh's 8th Five-Year Plan (2021-2025) with targets to attain 8.51 percent GDP growth and reduce the poverty rate to 15.6 percent at the end of this period.

The Perspective Plan 2021-2041, The Delta Plan 2100, and the SDGs were considered the 8th five-year plan,” said the Planning Minister adding that it is

Brainstorming Session

Former US Secretary of State **Henry Kissinger** has stated Bangladesh as a “**bottomless basket**” in the world. It means that the country was designed to be a hopeless and endless case of international charity! In early days after independence Bangladesh also was designated as a “Test Case” for development. But now it can be said that Bangladesh is the “Emerging Tiger” of Asia.

Is Bangladesh a promising country?

Let's Explore the folded **Prospects**
of Bangladesh Economy.

Bangladesh: Emerging tiger of Asia!

According to a global monitor on economics, with three positive statistics of per capita income, good ranking among 177 countries and a slower population growth rate Bangladesh is one of the most promising economies in the world today.

Because Bangladesh has-

- ❑ Great geo-political opportunity for strategic the location close to China and India.
- ❑ Bangladesh's society of 160 million people is a largely homogeneous society.
- ❑ Middle-class is rising & would be 25% of the total population by 2025.
- ❑ Enthusiastic, hardworking, and cheap labor is available to supply for any labor-intensive industry.
- ❑ The Huge demographic dividend has created the window of economic opportunity
- ❑ Goldman Sachs includes Bangladesh in the "Next 11" emerging countries to watch for along with the BRIC countries (Brazil, Russia, India, and China).

BLUE ECONOMY and Bangladesh

Blue Economy: Blue economy means extraction of the resources of sea for the growth of an economy.

Blue Economy in Bangladesh: Bangladesh possesses enormous water body with the blessings of Bay of Bengal situated at the southern part of Bangladesh.

It has sovereign rights through international court verdicts on more than 118,813 square km of maritime territory, 200 nautical miles of exclusive economic zone, and 354 NM continental shelves from the Chittagong coast. It has raised hopes of extracting “plenty of resources” from the Bay of Bengal, considered by Bangladesh as its “third neighbor”.

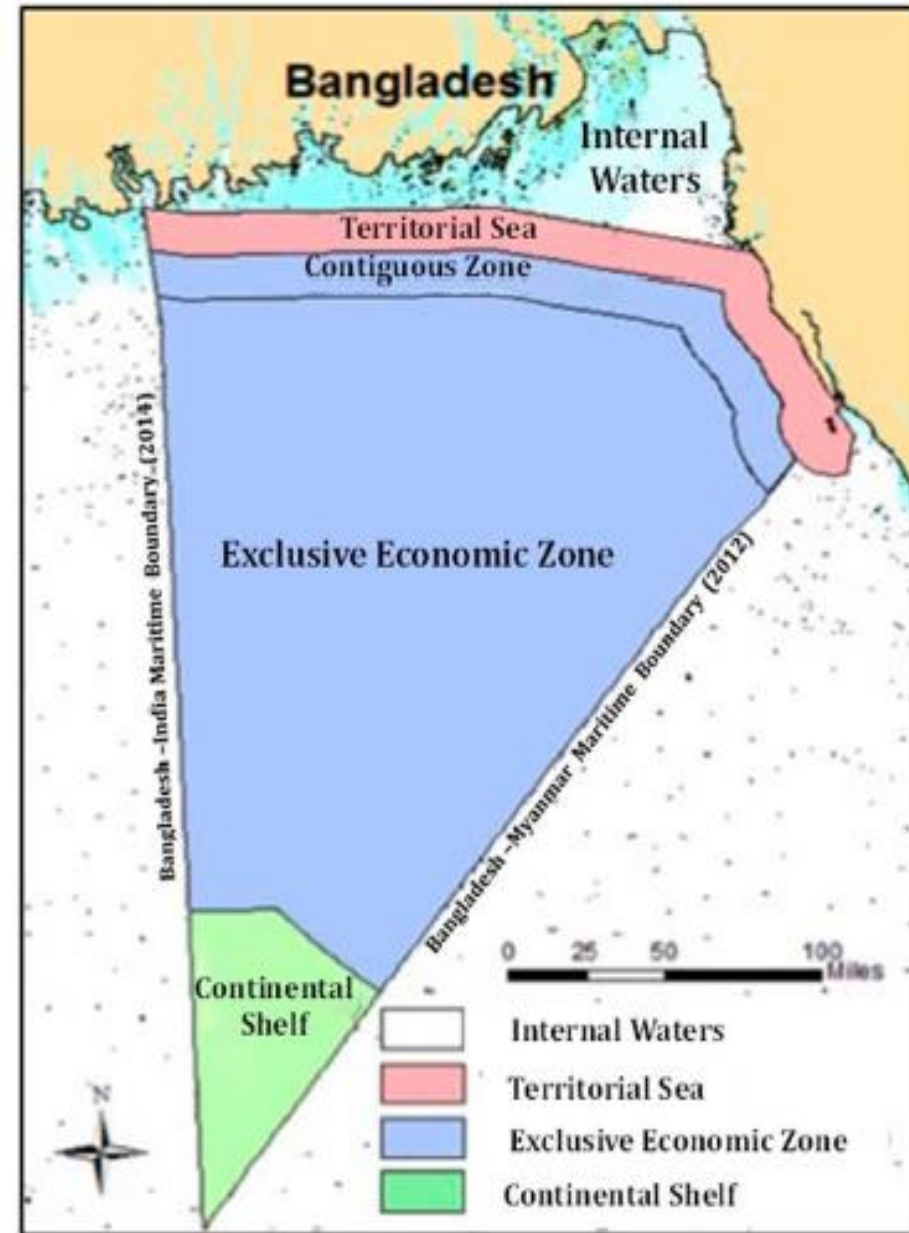

Figure 1. Maritime area of Bangladesh (MoFA, 2014c).

Gig ECONOMY and Bangladesh

Gig Economy: A gig economy is a free market system in which temporary positions are common and organizations contract with independent workers for short-term engagements. The term "gig" is a word meaning "a job for a specified period of time". Examples of gig employees in the workforce could include freelancers, independent contractors, project-based workers and temporary or part-time hires. The result of a gig economy is cheaper, more efficient services, such as Uber, Pahtao for those willing to use them.

Key Takeaways

- The gig economy is based on flexible, temporary, or freelance jobs, often involving connecting with clients or customers through an online platform.
- The gig economy can benefit workers, businesses, and consumers by making work more adaptable to the needs of the moment and demand for flexible lifestyles.
- At the same time, the gig economy can have downsides due to the erosion of traditional economic relationships between workers, businesses, and clients.

Gig ECONOMY and Bangladesh

Benefits of working in a Gig Economy

- Job Flexibility
- Work Variety
- Ease of Entry
- Low cost
- Taste of Entrepreneurship
- Additional income and personal growth

Drawbacks of Gig Economy

- Lack of Protection
- Lack of fair pay
- Not as flexible as advertised
- No fringe benefits
- Stress due to Constant Evaluation
- Threat to Occupational Safety and Health

Circular Economy of Bangladesh

A circular economy is a systemic approach to economic development designed to benefit businesses, society, and the environment. In contrast to the ‘take-make-waste’ linear model, a circular economy is regenerative by design and aims to gradually decouple growth from the consumption of finite resources.

“A circular economy is an industrial system that is restorative or regenerative by intention and design. It replaces the end-of-life concept with restoration, shifts towards the use of renewable energy, eliminates the use of toxic chemicals, aims for the elimination of waste through the superior design of materials, products, systems, and business models.

Linear economy of Bangladesh

Linear economy is a system in which people buy a product, use it, and then throw it away.

key characteristics:

1. Resource Depletion:

The linear economy relies heavily on extracting virgin resources, which are finite and can be depleted at unsustainable rates.

2. Mass Production and Consumption:

It promotes high volumes of production and consumption, often prioritizing quantity over quality or sustainability.

3. Waste Generation:

Products are designed for short-term use and are often discarded after minimal use, leading to a large amount of waste that is not recycled or reused.

4. Environmental Impact:

The linear economy contributes to environmental degradation through resource extraction, pollution from manufacturing processes, and the accumulation of waste in landfills and incinerators.

5. Focus on New Production:

The model prioritizes the creation of new products rather than extending the lifespan of existing ones or finding ways to reuse or recycle materials.

6. Lack of Feedback Loops:

The linear economy lacks feedback loops that would allow for resource recovery and reuse, leading to a one-way flow of materials from extraction to disposal.

7. Dependence on virgin materials

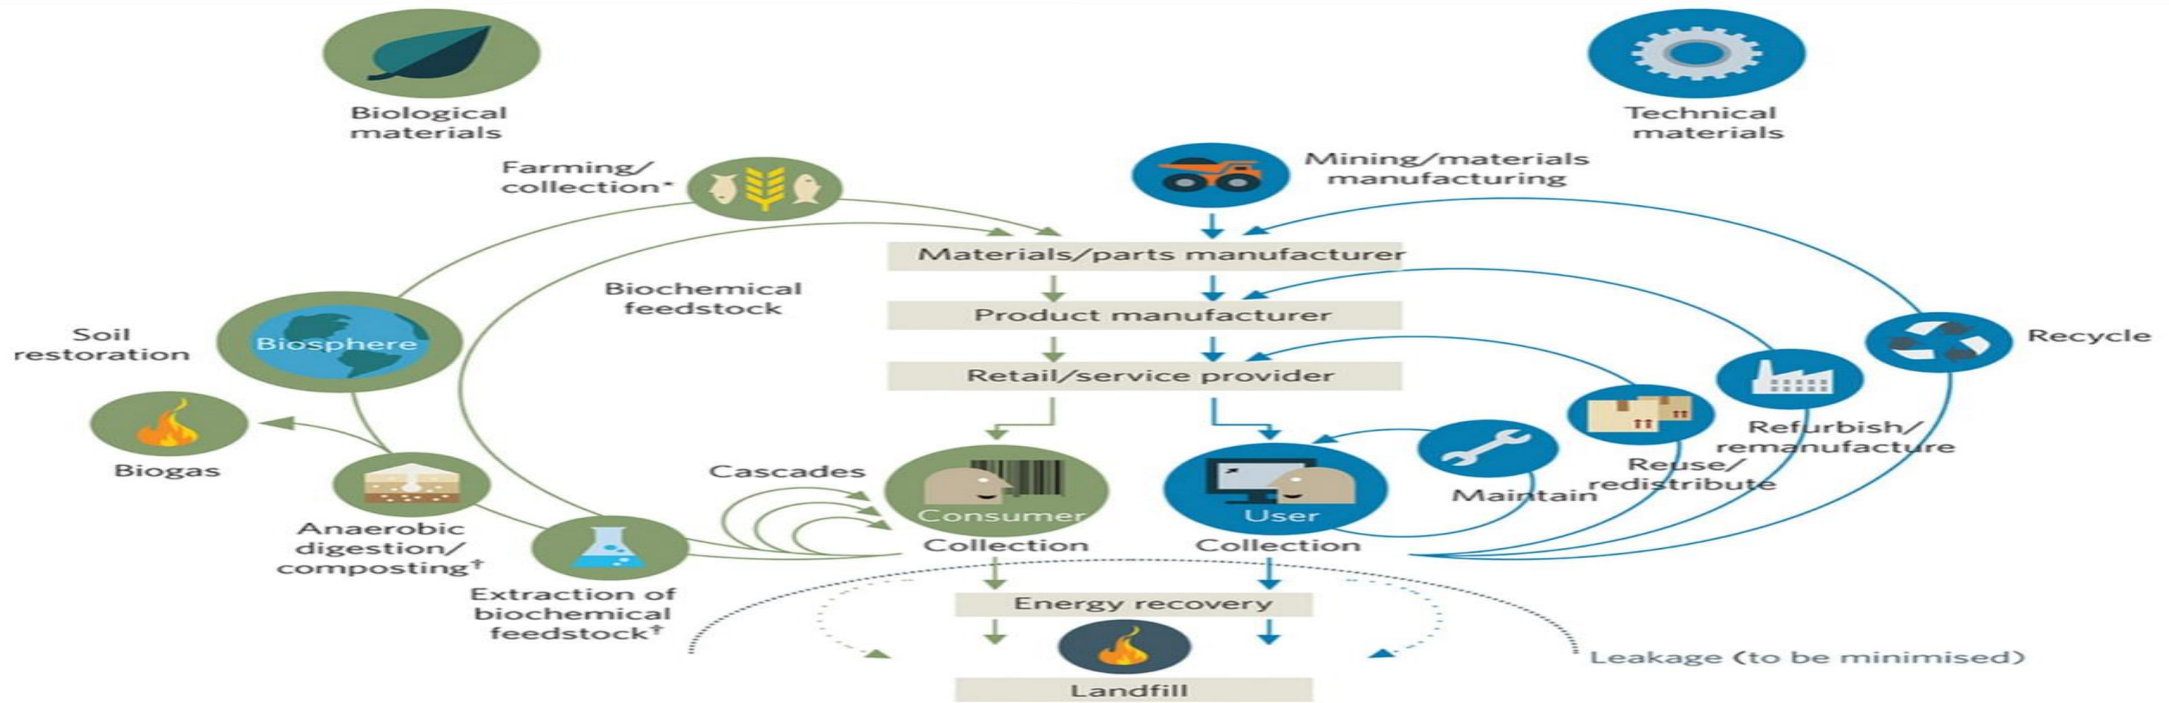

The linear economy is based on the assumption that raw materials are infinitely available, leading to a dependence on virgin material

Linear economy to Circular economy

LINEAR ECONOMY

CIRCULAR ECONOMY

Benefits Of The Circular Economy Model

Environmental Benefits Of The Circular Economy

- **Fewer Greenhouse Gas Emissions .**
- **Healthy And Resilient Soils**

Economic Benefits Of The Circular Economy

- **Increased Potential For Economic Growth**
- **More Resources Saved**
- **Employment Growth**
- **An increase in new businesses.**
- **An increase in consumption and spending by lower prices.**

Barriers Of The Circular Economy Model

Economic Barriers To A Circular Economy Model

- Social and environmental externalities are not valued,
- privileging financial market interest instead of people and nature when economic decisions are made;
- Good quality secondary resources are not competitive;
- Circular economy business models are harder to develop, as most investors are still working under a linear economy logic and sometimes upfront investments are required;
- The demand for circular products and alternatives is still small,
- There aren't still many qualified professionals with technical or 'information and communication technology' (ICT) knowledge.

Key challenges in economic Sector of BD

- ☐ Corruption
 - ☐ Political Instability
 - ☐ Inadequate Government and Bureaucratic Structures
 - ☐ Aid Dependence
 - ☐ Over growth of Population
 - ☐ Land Scarcity
 - ☐ Natural Disaster
 - ☐ Increase rate of Unemployment
 - ☐ Patronize Bank Defaulters culture
 - ☐ Lack of Knowledge and Skills
 - ☐ Not ensure Financial Freedom
 - ☐ Improper Combination & Coordination
 - ☐ Lack of Skilled and Sound Manpower
 - ☐ Improper role of Various Organizations
 - ☐ Improper role of press and media
 - ☐ Improper role of the Foreign Ministry
 - ☐ Less experience of Foreign Diplomats
 - ☐ Inequality
 - ☐ Presence of black money
 - ☐ Money Laundering
 - ☐ Lack of Proper Planning

Steps need to develop the Economy of BD

- ❑ Build National & International Cooperation.
- ❑ Increase Remittances & Intellectual Investment.
- ❑ Need Market Expansion.
- ❑ Increase promotion of Trade Market.
